

RightFind™

Enterprise

The fastest way to find, share and manage content

The RightFind™ Enterprise content workflow solution from RightsDirect connects your colleagues to the full range of high-value copyrighted information they want. Advanced administrative features offer sophisticated usage and spending analytics tools, providing valuable insight into what published information matters most to your organization. RightFind also integrates seamlessly with your annual RightsDirect license to make copyright-compliant collaboration easier.

Features and Benefits

Speed up innovation with faster content access.

RightFind searches across your subscriptions, Open Access sources and internal electronic and print collections to get full-text articles to employees faster. If the article users want isn't in your holdings, they can buy it on the spot through our document delivery service.

View your license rights instantly.

RightFind's Know Your Rights advisory tool works with your RightsDirect Annual Copyright License to show exactly how you and your colleagues can share published material.

Seamless integration in users' workflow.

Employees can search within RightFind to find the articles they want, or use another search and discovery platform such as PubMed, Ovid or SciFinder.

Collaborate with colleagues.

RightFind was designed with collaboration in mind, offering tools for storing, organizing, and tagging articles by project, team or geography.

Make data-driven content decisions.

To help you track spending and content usage, RightFind gives you real-time analytics available at your convenience.

See how RightFind Enterprise can help you increase efficiency, streamline employee workflow, strengthen your compliance program and save money.
