Content Workflow Solutions and Services

RightsDirect

A Copyright Clearance Center Subsidiary

WHY CHOOSE RIGHTFIND?

- **Speed up innovation with faster content access –** RightFind searches across your subscriptions, Open Access sources and internal collections to get full-text articles to employees faster. If users need an article that isn't in your holdings, they can buy it on the spot with RightFind's document delivery capabilities.

- **Simplify copyright compliance –** RightFind works with your Multinational Copyright License, CLA & CCC Joint Multinational Copyright Licence and JAC Digital Copyright License to show exactly how you and your colleagues can share and reuse published material. Our rights management technology is the only source for direct, accurate information about your RightsDirect text license rights.

- **Make more informed purchases –** To help you track spending and content usage, RightFind gives you real-time analytics available at your convenience. See what published material employees use most so you can optimize future content purchases.

CONTENT IS AT THE HEART OF INNOVATION

But getting to the right content is often a challenge.

The more time your employees spend looking for the content they need, the less time they have to analyze and solve problems, make key decisions and bring products and services to market. Streamlining the research process and understanding how published information is used and shared in your organization can help you:

- Save time and money

- Realize gains in employee productivity and innovation

- Minimize copyright infringement risk

- Get the most value from company subscriptions

INTRODUCING RIGHTFIND™ CONTENT WORKFLOW SOLUTIONS

RightFind™ content workflow solutions from RightsDirect provide your employees with fast, easy access to the full range of high-value copyrighted information they need – anytime, anywhere. Advanced administrative features offer the ability to configure the solution to meet the unique needs of your employees, while sophisticated usage and spending analytics tools provide you with valuable insight into how published information is used in your organization. RightFind integrates seamlessly with your RightsDirect and CCC annual licenses to make copyright-compliant collaboration easier.

The optional RightFind text mining solution enables researchers and bioinformatics staff to identify and download full-text, XML-formatted content from multiple publishers for use in commercial mining projects.

HOW RIGHTFIND WORKS

Researchers can quickly obtain published information from internal collections, company subscriptions, Open Access sources, and document delivery, and share articles with colleagues around the world. These solutions help you uncover hidden content costs, get the most value from company subscriptions and help your employees comply with copyright.

No other content workflow solution today delivers this powerful combination of content, rights and information management expertise. The result? You save money by accelerating the flow of research, maximizing the value of your subscriptions and streamlining your information management operations.

Search for content using RightFind, PubMed or another discovery platform.

Get full-text articles from company subscriptions, Open Access and internal documents.

Purchase articles that aren't in your company holdings.

See the rights you have to share that content.

Track content usage and spending to inform future purchases.

FIND, SHARE AND MANAGE CONTENT

Whether you have an established information management center with a large number of holdings and a high volume of document delivery requests, or if you are a growing business with a decentralized information management model, RightFind content workflow solutions are flexible enough to meet your unique information needs. These solutions offer a range of optional enhancements including:

- **Digital library –** Store licensed content for secure sharing with colleagues (requires a RightsDirect copyright license).

- **Granular rights and subscription configuration –** Give employees instant access to your organization's licensed or purchased content, including rights from annual licenses, publisher agreements, subscriptions, and more.

- **Content usage analytics –** RightFind captures and displays a wide variety of usage data in standard and custom reports built to facilitate budget management and charge-backs.

- **Document delivery –** Employees can purchase articles not available through company subscriptions.

- **Workflow integration –** Employees can search within RightFind to find the articles they want, or use another search and discovery platform.

ADDITIONAL MODULES
IMPROVE TEXT MINING RESULTS

RightFind™ XML for Mining

The RightFind XML for Mining solution enables researchers to identify and download full-text article collections from multiple publishers through a single source and import those results into their preferred text mining software. Go beyond the abstract level to search, download and mine full-text articles in XML format from both company subscriptions as well as unsubscribed published material. You'll save valuable time otherwise spent acquiring, licensing and converting articles from individual publishers.
