

Using RightFind® for Pharmacovigilance

One collaborative, cloud-based library space for colleagues to monitor, review and automate the literature review process.

Monitoring medical literature to detect safety signals is a core component of pharmacovigilance. As data sources increase and regulatory requirements vary across the globe and are constantly shifting, it has become harder for organizations to ensure their drug safety profiles are properly — and efficiently — evaluated.

RightFind®, the cloud-based content workflow solution from Copyright Clearance Center and its subsidiary RightsDirect, provides pharmacovigilance teams a shared library space for colleagues to monitor, review and automate the literature review process.

HOW IT WORKS

Create a Shared Library that captures citations for a product.

Review and manage literature with colleagues.

Purchase articles that aren't in your company's collections.

Create reports to send to regulatory bodies.

RIGHTFIND PHARMACOVIGILANCE ADVANTAGES:

Rapidly Identify Adverse Events

Review literature at your own pace and discretion. Citations will prepopulate automatically in your libraries from multiple databases, based on the customizable alerts you set.

Satisfy Regulatory Requirements

Easily create reports that may be used to satisfy regulatory bodies. Changes to documents are automatically tracked, providing a comprehensive audit trail.

Create Custom Libraries by Product

Organize citations by product, with options to collaborate throughout the literature review process. Content can be stored, organized and tagged by project, team or geography.

Skip a Manual Content-Ordering Process

Purchase articles that aren't in your company's collections directly within your workflow. Most documents are delivered in 5 minutes or less.

Get Quick Access to Content

In addition to providing fast document delivery, RightFind searches across your subscriptions, Open Access sources and other internal collections to provide full-text articles instantly.

Get the Latest Research

Import citations on a regular schedule from PubMed or Ovid into a shared library.

The screenshot shows the RightFind web application interface. At the top, there's a search bar with 'fluticasone' entered. Below the search bar, there are navigation options like 'My Libraries' and 'Select Library'. The main area displays search results for 'fluticasone' with columns for 'TAGS', 'TOPICS', and 'FILTERS'. The results list includes items like 'Example Title', 'Example Article Title', and 'Patterns of asthma-related health care resource use in children treated with montelukast or fluticasone'. Each result shows a title, a date, and a document type (e.g., Document, Journal Article). The interface also shows a 'Results per page' dropdown set to 50 and a total of 17 results in 1 page.

Copyright Clearance Center (CCC) builds unique solutions that connect content and rights in contextually relevant ways through software and professional services. CCC helps people navigate vast amounts of data to discover actionable insights, enabling them to innovate and make informed decisions. CCC, with its subsidiaries RightsDirect and Ixxus, collaborates with customers to advance how data and information are integrated, accessed, and shared while setting the standard for effective copyright solutions that accelerate knowledge and power innovation. CCC is headquartered in Danvers, Mass., with offices across North America, Europe and Asia. To learn more about CCC, visit www.copyright.com.

A Copyright Clearance Center Subsidiary

RightsDirect provides content workflow, document delivery and rights licensing solutions that allow companies around the world to use, share and store content while simplifying copyright compliance. Working with partners around the world, RightsDirect offers sophisticated solutions tailored to the needs of national and global organizations. RightsDirect is a wholly-owned subsidiary of Copyright Clearance Center based in Amsterdam with presence in Tokyo and Munich.
