

RIGHTFIND SHARED AND PERSONAL LIBRARIES ADVANTAGES

RightFind[®] Shared and Personal Libraries

One convenient workflow for purchasing, organizing, and collaborating on content to drive innovation

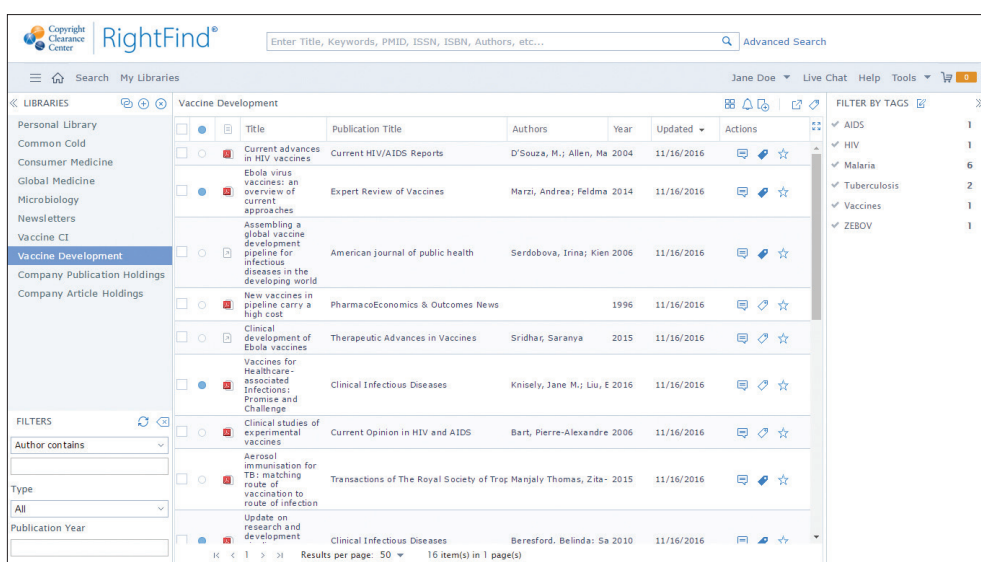

Providing researchers with access to published and unpublished content across an enterprise is critical to facilitating collaboration and driving innovation. However, knowledge managers face challenges when trying to simplify content sharing across teams and global geographies. Employees often store content on their individual hard drives, making it impossible to collaborate on content. And, with all this content stored in different tools and locations, how can you be sure everyone across the enterprise has the rights to access and share copyrighted content?

RightFind shared and personal libraries make it easy to store, organize, and collaborate on content within teams and across the enterprise.

- Facilitate collaboration within teams
- Export citations in a few clicks to quickly generate bibliographies
- Search all content, including full text articles, abstracts, and citations
- Simplify copyright compliance with seamless checking of rights to view content
