

## RightFind<sup>®</sup> Passport

### *Simplify Content Authentication*

Maintaining a large set of IP ranges that are constantly changing is a challenge for organizations who want to ensure employees have access to all of their licensed content. RightFind<sup>®</sup> Passport, powered by EZproxy<sup>®</sup>, allows users to securely access your organization's content from any location, on any browser-enabled device, supporting the growing adoption of virtual workspaces and bring-your-own-device (BYOD) policies. Additionally, RightFind Passport enables you to collect accurate content usage data on who is using your licensed content, helping you optimize your content spend.

### RIGHTFIND PASSPORT ADVANTAGES:

- Gain secure remote access to your organization's content
- Get insights on who is using content
- Simplify your authentication process

## GAIN SECURE REMOTE ACCESS TO YOUR ORGANIZATION'S CONTENT

With the rapid adoption of virtual work spaces, many companies face growing challenges when trying to ensure all employees have access to subscribed content, regardless of whether employees are working from their offices or from their homes. With RightFind Passport, your users can access content remotely, such as subscriptions and databases, without requiring use of a VPN or company network because authentication happens through RightFind.

## GET INSIGHTS ON CONTENT USAGE

Knowledge managers today are looking for ways to effectively demonstrate how content investments support the company's strategic business goals and tell a content ROI story. RightFind Passport captures all content requests and directs them through RightFind, tracking content usage down to the individual user level. This provides data on who is using your databases or subscriptions and can help you optimize your content spend.

## SIMPLIFY YOUR AUTHENTICATION PROCESS

It can be very time consuming to manually track the IP address of every employee, deliver that information to each publisher, and continuously maintain that information. RightFind Passport simplifies the content authentication process and provides uninterrupted access to content. Additionally, RightFind Passport uses a single, unique IP address making it unnecessary to manually track the IP address of every employee and maintain that information.

## HOW IT WORKS

RightFind Passport acts as an intermediary between RightsDirect's RightFind platform and publishers' content servers. When using RightFind Passport, all user content requests are funneled through RightFind to a unique proxy server that relays the request to the publisher websites. By acting as the clearing house for all connections to content on third party publisher websites, RightFind Passport simplifies the content authentication process.

**RightsDirect**

A Copyright Clearance Center Subsidiary

RightsDirect provides licensing solutions that make copyright compliance easy, allowing companies to re-use and share the most relevant digital content across borders. With RightsDirect copyright licenses and complementary information management tools, users can instantly check license coverage, manage permissions and optimize content workflow in one integrated solution. Based in Amsterdam and with a presence in Munich and Tokyo, RightsDirect is a wholly-owned subsidiary of Copyright Clearance Center (CCC). Together, CCC and RightsDirect serve more than 35,000 companies and over 12,000 publishers around the globe.
