RightFind®
XML for Mining

Improve your text mining results with full-text XML articles

RightFind® XML for Mining from Copyright Clearance Center (CCC) takes your text mining projects beyond abstracts to give you direct access to full-text scientific, technical, and medical content in XML format. Now you can identify and download full-text article collections from multiple publishers through a single source and import those results into the text mining software you prefer. You'll save valuable time otherwise spent acquiring, licensing and converting articles from individual publishers. XML for Mining gives you more accurate and richer results enabling you to make discoveries that can only be found in the full text.

FEATURES AND BENEFITS

Improve the results of your text mining efforts.
XML for Mining enables you to make discoveries and connections that can only be found in full-text. You can obtain XML-formatted content from publications you subscribe to and discover articles that fall outside of company subscriptions, giving you the most complete article collection for mining.

Simplify copyright compliance.
Because all of the content in the service is pre-authorized for commercial text mining, you get the peace-of-mind that your text mining projects comply with copyright, minimizing your organization's infringement risk.

Save time and money.
XML for Mining aggregates article content and normalizes metadata from multiple publishers into a secure cloud for fast and easy access, reducing the time and costs associated with article conversions, content management and negotiations with publishers. You get more time to focus on analysis and discovery.
Copyright Clearance Center

Copyright Clearance Center (CCC) is a global leader in content management, licensing, discovery and delivery solutions. Through its relationships with those who use and create content, CCC drives market-based solutions that fuel research, power publishing and respect copyright. With its subsidiaries RightsDirect and Ixxus, CCC provides solutions for millions of people from the world's largest companies and academic institutions.
