

## RightFind Navigate benefits

# RightFind Navigate

## Maximize the return on content and data investments to drive innovation

R&D-intensive companies must accelerate research and drive innovation to compete effectively, but when content is locked away in silos it hinders discoverability and slows research. To maximize the value of digital information, organizations must eliminate silos to make content more discoverable and accessible.

RightFind Navigate breaks down inefficiencies caused by information silos to reveal connections and insights that drive innovation. RightFind Navigate securely unifies licensed content, publicly available data sources, and internal proprietary information through an open ecosystem to maximize return on content and data investments.

Unify the search experience  
to increase discoverability

Personalize results base on  
what's relevant to each user

Accelerate insights by making  
information connections to enrich  
the R&D pipeline

Get more value from your  
existing investments in content,  
data, and vocabularies

Find relevant scientific concepts  
faster using public, licensed,  
and custom vocabularies

## Powerful capabilities to drive innovation

### Unify data sources

Eliminate data silos to increase awareness of content resources, including public, licensed, and proprietary internal resources to maximize the value of your digital information assets with flexible pre-built or custom data connectors that enable fast, secure access to content and data.

### Find relevant content

Users can enable a personalized search experience powered by machine learning that delivers content recommendations specific to each user.

### Smarter information discovery

Perform aggregated search via a single unified search experience that displays the data most meaningful to users and enables connections across multiple data sources.

### Enable insights

Explore information relationships with dynamic visualizations to accelerate insights by making information connections and enriching the R&D pipeline with new ideas.

### Seamless RightFind Enterprise integration

Centralize content discovery and access to RightFind's STM database of over 145 million citations and 5 million open access articles and enable copyright-compliant content reuse, storage, and collaboration in unique workflows.

### Semantic search

Identify relevant documents with an expanded search that incorporates synonyms. From PubMed's MeSH to SciBite VOCabs, RightFind Navigate supports publicly available, licensed and custom vocabularies.

### Built for growth

Designed to scale with you, a flexible open integration ecosystem makes it straightforward to add new data sources and vocabularies as your organization expands over time.

### Topic interactions

Filter your search results by topics in the Analytics pane to explore how topics co-relate and quickly get the information you want.

## Why CCC?

At CCC, we help companies manage vast amounts of published content and proprietary internal information and data. We have a proven track record of working with a wide range of companies, including content providers and technology partners, to unify data sources and make content more discoverable. We are experts in processing data from nearly all major publishing houses and metadata aggregators accounting for more than 120 million unique records per year across a diverse set of industries.

RightFind Navigate enhances discovery by unifying siloed content and data

### About CCC

A pioneer in voluntary collective licensing, CCC (Copyright Clearance Center) helps organizations integrate, access, and share information through licensing, content, software, and professional services. With expertise in copyright and information management, CCC and its subsidiary RightsDirect collaborate with stakeholders to design and deliver innovative information solutions that power decision-making by helping people integrate and navigate data sources and content assets.
