

2023 Information Seeking and Consumption Report

For professionals in Oil and Gas Extraction, using content is essential for collaboration and staying abreast of regulatory requirements, market shifts, environmental impacts, and more. With constant pressure to reduce costs, optimize performance, and meet rising global demand, the behaviors and attitudes of professionals in this industry regarding content use and sharing have shifted over time as they seek to establish a competitive edge in an ever-changing landscape. For many, the transition to hybrid and remote work for has created new dynamics for information sharing including how employees engage and collaborate with published content. The Information Seeking and Consumption Study focused on insights into how people think and behave in the context of copyrighted content consumption, use, and sharing, both within and outside the walls of their organizations, and the impact of remote working. Here's what we learned:

Importance of Content

Knowledge workers in Oil and Gas Extraction consider **10 different print or digital publications critical to their job function**.

Types of externally published content used at work

The Velocity of Content is Shifting

The number of people with whom information is shared across professional Oil and Gas Extraction environments has increased since 2020, with respondents sharing work-related content **9 times per week with 13 other people**. Considering that **54% of that content is sourced from external providers** such as scientific journals, news sources, and other publications, there is **potential for more than 62 instances of unlicensed sharing per employee per week** if proper permissions are not in place.

9 times per week with
13 other people
(2023)

vs.

23 times per week with
9 other people
(2020)

Impact of Remote Work

The transition to hybrid and remote work in many industries has created new dynamics for information sharing. On average, **9% of respondents in Oil and Gas Extraction reported a fully remote work environment and 52% reported a hybrid environment**, of which:

Copyright Awareness and Attitudes

Companies are sharing copyright policy more frequently, but employees are still sharing published content. **83% of employees claim to be aware of their company's copyright policy.** However, according to Outsell's newest research, employee attitudes and behaviors don't always align with policy awareness.

Why It Matters?

While the sharing of information with co-workers supports collaboration and drives innovation, the sharing of published information without obtaining the necessary subscriptions, licenses, or permissions also carries enormous potential risk. Ordinary content exchanges that come so naturally in the digital world can increase the risk of copyright infringement, costly lawsuits or settlements, and result in damage to brand reputation.

By taking steps to balance employee reuse of published content with a strong compliance and licensing program, your company can leverage today's rise in content sharing to help support collaboration and drive innovation.
